SUMMARY

Product Manager / Product Owner with **10 years of experience leading complex IT products in international environments**. I conduct **user discovery**, own the **product vision**, build and prioritize the **roadmap and backlog** with Scrum teams, and lead **delivery** through to production with **development squads**.

PROFESSIONAL EXPERIENCE

Product Manager — May 2026

BlaBlaCar (Case study - Noé training program), Paris

Product: BlaBlaCar iOS mobile app

Challenge: As part of the Noé program, I spent one month working on a real challenge from BlaBlaCar's roadmap: "How can we improve the first-trip success rate for new drivers (30%) compared with repeat drivers (50%)?"

Target: +10 percentage points in the first-trip success rate for new drivers

- Analyze data from **100,000 trips** and conduct user research through **9 interviews** to define user needs
- Prioritize solutions using an **impact/effort matrix**
- Test prototypes with **users** and iterate on the **UX/UI** for **3 high-impact solutions**

Result: Presented to BlaBlaCar's Lead PM a high-fidelity Figma prototype validated through user testing

---

IT Finance & Budget Management Product Manager — 2023 – 2025

Bartle, Paris - Assignment at Bolloré (Head Office, carve-out), then La Poste (DSI-BGPN, centralization)

Product: IT cost management tool

Challenge: How can IT costs (portfolios of up to €230m) be managed, prioritized, and optimized during a carve-out (Bolloré) and then an IT centralization program (La Poste, DSI-BGPN)?

- Conduct interviews with **directors and operational managers** (Bolloré Head Office; La Poste DSI-BGPN) to define reporting needs and priority trade-offs
- Participate in **investment committees** to approve IT budgets and monitor variances
- Design an IT cost management tool (**MVP in 2 months**) and expand it into a **product and service catalog (CIGREF framework)**

Result: 2 client engagements delivered (Bolloré, La Poste) | IT-Finance product/service catalog | **5% year-over-year reduction in IT costs** across each scope | **MVP delivered in 2 months**

Product Owner & Finance Transformation Lead — 2020 - 2023

Renault, Vélizy

Product: Supply Chain financial consolidation tool (**€8m, 25+ users, 10 countries**)

Challenge: How can global Supply Chain cost reporting be made more reliable, detailed, and timely (target: D+5 instead of D+10)?

- Map the **end-to-end process** by interviewing management controllers in each country to identify reliability and lead-time pain points
- Define **performance indicators** and redesign the presentation of results (focusing on vehicles with significant financial exposure) to support decision-making by the **Executive Committee**
- Lead the reporting product roadmap with the **squad (1 Tech Lead, 3 developers)**: write User Stories and acceptance criteria, prioritize the product backlog with the squad, test the solution, train key management controllers, and deploy two enhancements (logistics costs; budget risks and opportunities)

Result: 50% shorter reporting lead time (D+10 → D+5) | harmonized cost structure across 10 countries | 25+ FTEs trained and supported

Costing Tools Product Owner — 2016 - 2020

Renault, Guyancourt

Product: Replacement of a 20-year-old in-house costing tool with a vendor SaaS solution (**€10m, 250 users, 12 countries**)

Challenge: How can an obsolete in-house costing tool be replaced with a standard SaaS solution while adapting it to Renault's specific calculation engine?

- Specify the functional requirements for the **calculation engine** (cost breakdown: purchasing, transformation, overhead, and finance costs) to tailor the vendor SaaS solution to Renault's needs
- Organize and lead **user acceptance testing (UAT)** with key users to validate calculation accuracy
- Lead the **multi-wave deployment across 12 countries** (Europe, South America, Japan), including training sessions

Result: Successfully replaced a 20-year-old legacy tool with a vendor SaaS solution deployed across 12 countries | 95% adoption rate | 15% improvement in calculation reliability and execution speed

Innovation Funding Consultant — 2014 - 2016

F-Initiatives, Puteaux

- R&D and innovation audit and advisory services for Research Tax Credit (CIR) claims
- Managed a portfolio of industrial and IT clients (€1m)
